

## WOODEN SUN SHADES

A mixture of light,  
shadow and wood.

WOODEN LOUVERED PERGOLA

# Serene designs

With a luxurious wooden louvered pergola by Carpentier, you can create a garden or patio area for idyllic pleasures.

Our stylish patio roofs have clean lines and a timeless look. They can be seamlessly integrated into an existing building or outbuilding, but are also ideal as a stand-alone pergola.

Only the wooden elements of this minimalist design are visible. The aluminium surface of the automated louvered pergola ensures optimal protection against precipitation. Rainwater runs off in a controlled manner via the piping, which is neatly tucked away in the posts.

### OPTIONS

- Operation  
Moveable louvers are usually in thermal ash. They can be operated as desired using a remote control, tablet or smart phone or even integrated into a home automation system.
- Sensors  
For extra comfort the louvered pergola can be equipped with fully automated rain and/or wind sensors.
- Led lighting

### SIDE ELEMENTS

- Sliding glass doors
- Wooden side panels
- Shutter panels with fixed or adjustable louvers

**Carpentier supplies every louvered pergola in a ready-to-assemble kit for quick and easy installation.**

WOODEN PATIO SHUTTERS

# Privacy and protection from wind and sun

Carpentier's wooden patio shutters are an ideal way to define a patio area or create a cosy seating area in the garden.

With the mechanical parts hidden away in the wooden frame, nothing mars the beauty of the patio shutters. Both vertical and horizontal louvers are available and can be adjusted to your precise wishes.

When closed, the louvers provide privacy and protection from rain, wind and glare. When open, they afford a clear view of the surroundings.

These wooden shutters are also ideal as a side wall or to integrate into a wooden outbuilding or louvered roof. They help make the very most of the late summer days.

**Carpentier supplies  
tailor-made wooden patio  
shutters to woodworking  
professionals in convenient,  
ready-to-assemble kits.**

## PREFER FIXED LOUVERS?

Opt for our shutter panels with fixed louvers. They are an equally attractive combination of timeless aesthetics and convenience.

WOODEN WINDOW SHUTTERS

# Ingenious solutions for windows, outdoor and indoor

Carpentier offers a varied collection of stylish window shutters with minimalist designs. Shutters not only help ensure a comfortable indoor temperature, but they are also an atmospheric design element and a beautiful, environmentally responsible alternative for energy-consuming air conditioning systems.

Depending on preference or the requirements of the space, customers can choose from a range of **fixed, side-sliding, side-folding and upward-folding shutters**. Our craftsmen produce shutters to measure in high-quality wood for a stunning result.

Every one of our shutter designs is an inventive creation and an ideal way to regulate natural light. Options include horizontal or vertical louvers and manual or automated operation. Shutters can also be integrated into home automation systems.

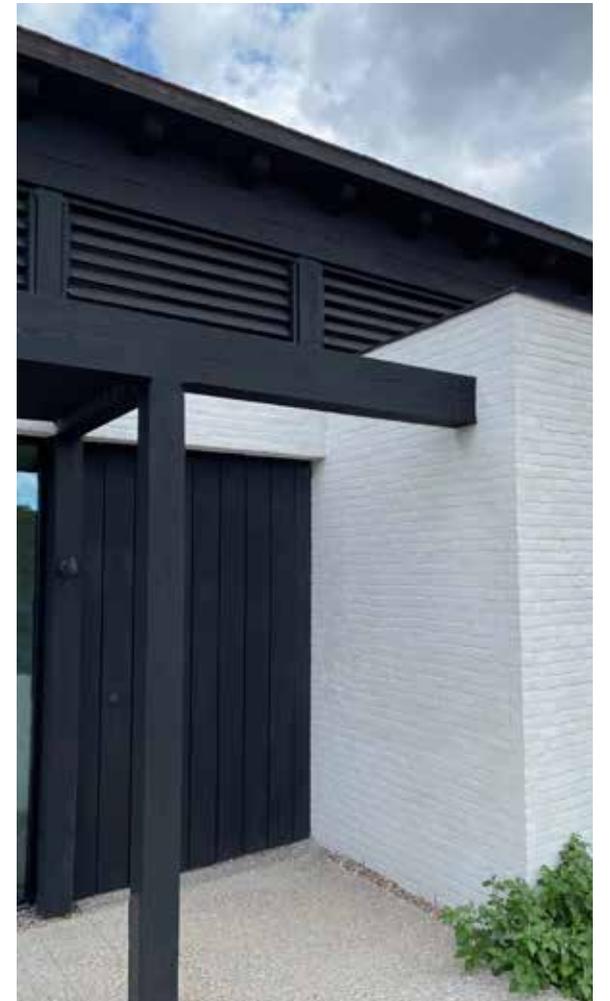

With mechanical parts fully integrated into the frame, only the natural beauty of the wood shines through.

**All shutter types are available to fit every type of window and delivered in a ready-to-assemble kit.**

Interior shutters add a touch of elegance and charm to any decor style.

Choice of vertical or horizontal louvers

WOODEN INDOOR SHUTTERS

# Stylish room divider

Our ecologically responsible wooden shutters are a perfect way to divide spaces without adding a solid wall.

They are ideal for a loft or office space, but also an eye-catching feature in the interior design of a house or apartment.

Indoor shutters add a dynamic element to a space and enable occupants to play with the effects of daylight. Adjustable louvers ensure just the right degree of privacy.

Carpentier creates wooden shutters to measure for each project, offering a range of finishes to complement any interior.

## WHY CHOOSE CARPENTIER?

### Minimalist designs

Minimalist architectural designs are more popular than ever. Clean lines and timeless styles are the central concepts. Our wooden sun shades are a stunning feature in both modern and classic settings.

### The warmth of wood

Wood is an attractive, sustainable material that brings warmth and natural beauty to a home or garden. Our high-quality wood varieties develop a gorgeous patina over time.

### Outstanding quality

Pure craftsmanship combined with innovative design solutions, created in cooperation with leading product developers: the best recipe for perfect results.

### Tailor-made creations

Carpentier designs each project to measure using top-quality materials. With products delivered as ready-to-assemble kits, professional installation is always straightforward.

### EPB norms

Carpentier wooden shutters help ensure buildings comply with EPB norms. Shutters are an environmentally-friendly way to deflect solar heat, eliminating the need for air conditioning systems.

## SUSTAINABLE WOOD

# Ecologically responsible wood varieties

Sustainable business practices and respect for the environment are top priorities for Carpentier, which was one of the first Belgian companies to achieve PEFC and FSC® certification.

We have stringent measures in place to ensure that all of our wood comes from legal, responsibly managed forests. We never work with tropical hardwoods, instead deliberately opting for ecologically responsible alternatives such as oak, barnwood, thermal ash, thermal pine, thermal bamboo, accoya, kebono, poplar and Douglas fir.
