SMART WOOD FOR NICE PLACES

WOODEN LOUVERED PERGOLA

# Serene designs

With a luxurious  
louvered roof pergola  
by Carpentier, you can  
create the perfect spot  
for enjoying a garden or  
patio.

Our stylish pergolas with louvers have an  
elegant, timeless look. They will blend in with  
an existing building or outbuilding seamlessly,  
and are also ideal as stand-alone pergolas.

Only the wooden elements of this minimalist design are visible. The aluminium surface of the motorised louvered pergola ensures the very best protection against rain and snow. Rainwater runs off in a controlled manner via the drainpipes, which are hidden neatly in the posts.

## OPTIONS

- Remote control, tablet or smart phone operating system
- Connection to a Smart Home System
- Rain and/or wind sensors
- LED lights

## SIDE ELEMENTS

- Wooden side panels
- Shutter panels with fixed or adjustable louvers
- Sliding glass doors

HORIZONTAL LOUVERED AWNING

# An elegant solution for sun protection

The horizontal louvered awning prevents indoor rooms from becoming too hot in the summer and makes a stylish feature on a façade. That is why we build each horizontal awning to measure and then delivered in kit form for quick and easy installation.

# Privacy and protection from wind and sun

Carpentier's wooden patio shutters are an ideal way to define a patio area or create a cosy seating area in the garden.

With streamlined mechanical workings with no visible screws, nothing mars the beauty of the patio shutters. Both vertical and horizontal louvers are available and can be tailored to your exact needs.

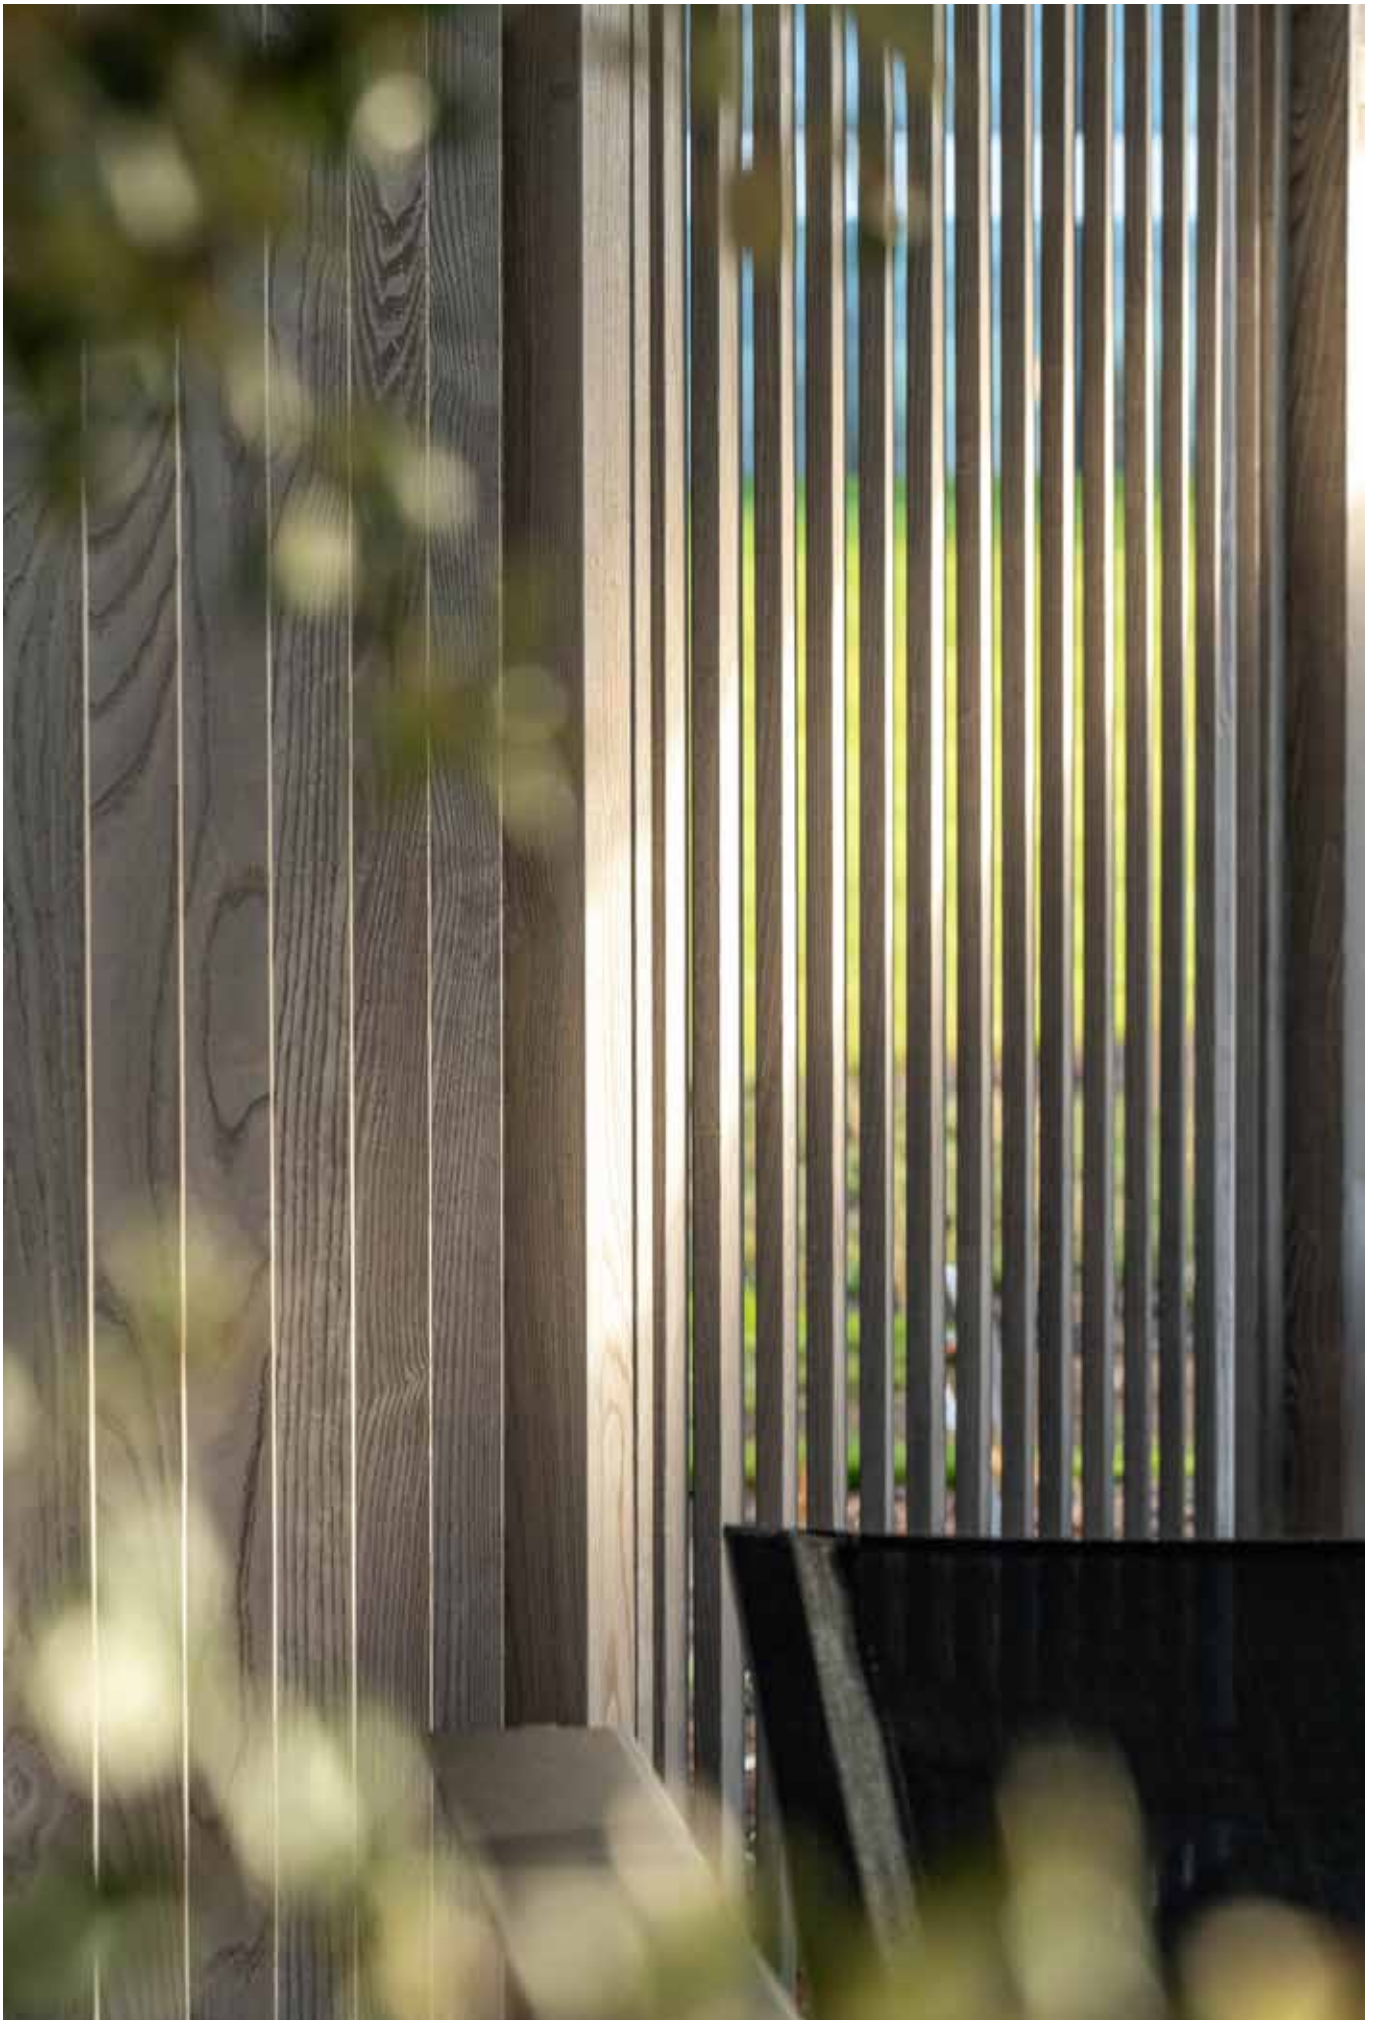

When closed, the louvers provide privacy and protection from wind, rain and glare. When open, they afford a clear view of the surroundings.

These wooden shutters can also be integrated as a side panel into a wooden outbuilding, patio cover or louvered pergola. They help make the very most of the late summer days.

# **Ingenious solutions for windows, outdoor and indoor**

Carpentier has a wide range of stylish window shutters in minimalist designs. Shutters not only help ensure the temperature remains pleasant indoors, they also help create a look and are an attractive, environmentally-friendly alternative to energy-consuming air conditioning systems.

**All shutter types are available to fit every window type and are delivered in a ready-to-assemble kit.**

Choice of vertical or horizontal louvers.

Interior shutters add a touch of elegance and charm to any decor style.

With our wooden sun protection for windows, you can allow just as much light to come indoors as you wish. You get to choose: rectangular or elliptical slats, fitted horizontally or vertically, inside or outside of the window. Thanks to a range of finishing options, our elegant window shutters can be altered to blend in harmoniously with a house's architecture and interior design.

The mechanism is made up of a basic, black aluminium profile, set on a wooden frame with no visible screws. This makes Carpentier's wooden shutters streamlined and attractive – nothing short of beautiful!

## OPTIONS

- Motorised or manual controls
- Connection to a Smart Home System

WOODEN ROOM DIVIDERS

# Stylish room dividers

Our environmentally-friendly wooden dividers are a perfect way to divide spaces without adding a solid wall.

They are ideal for a loft or office space, but also an eye-catching feature in the interior design of a house or apartment.

A room divider adds a dynamic element to a space and enables occupants to make the most of the effects of daylight. Adjustable louvers ensure just the right degree of privacy.

Carpentier creates bespoke room dividers in wood for each project, offering a range of finishes to complement any interior.

BESPOKE XXL SHUTTERS

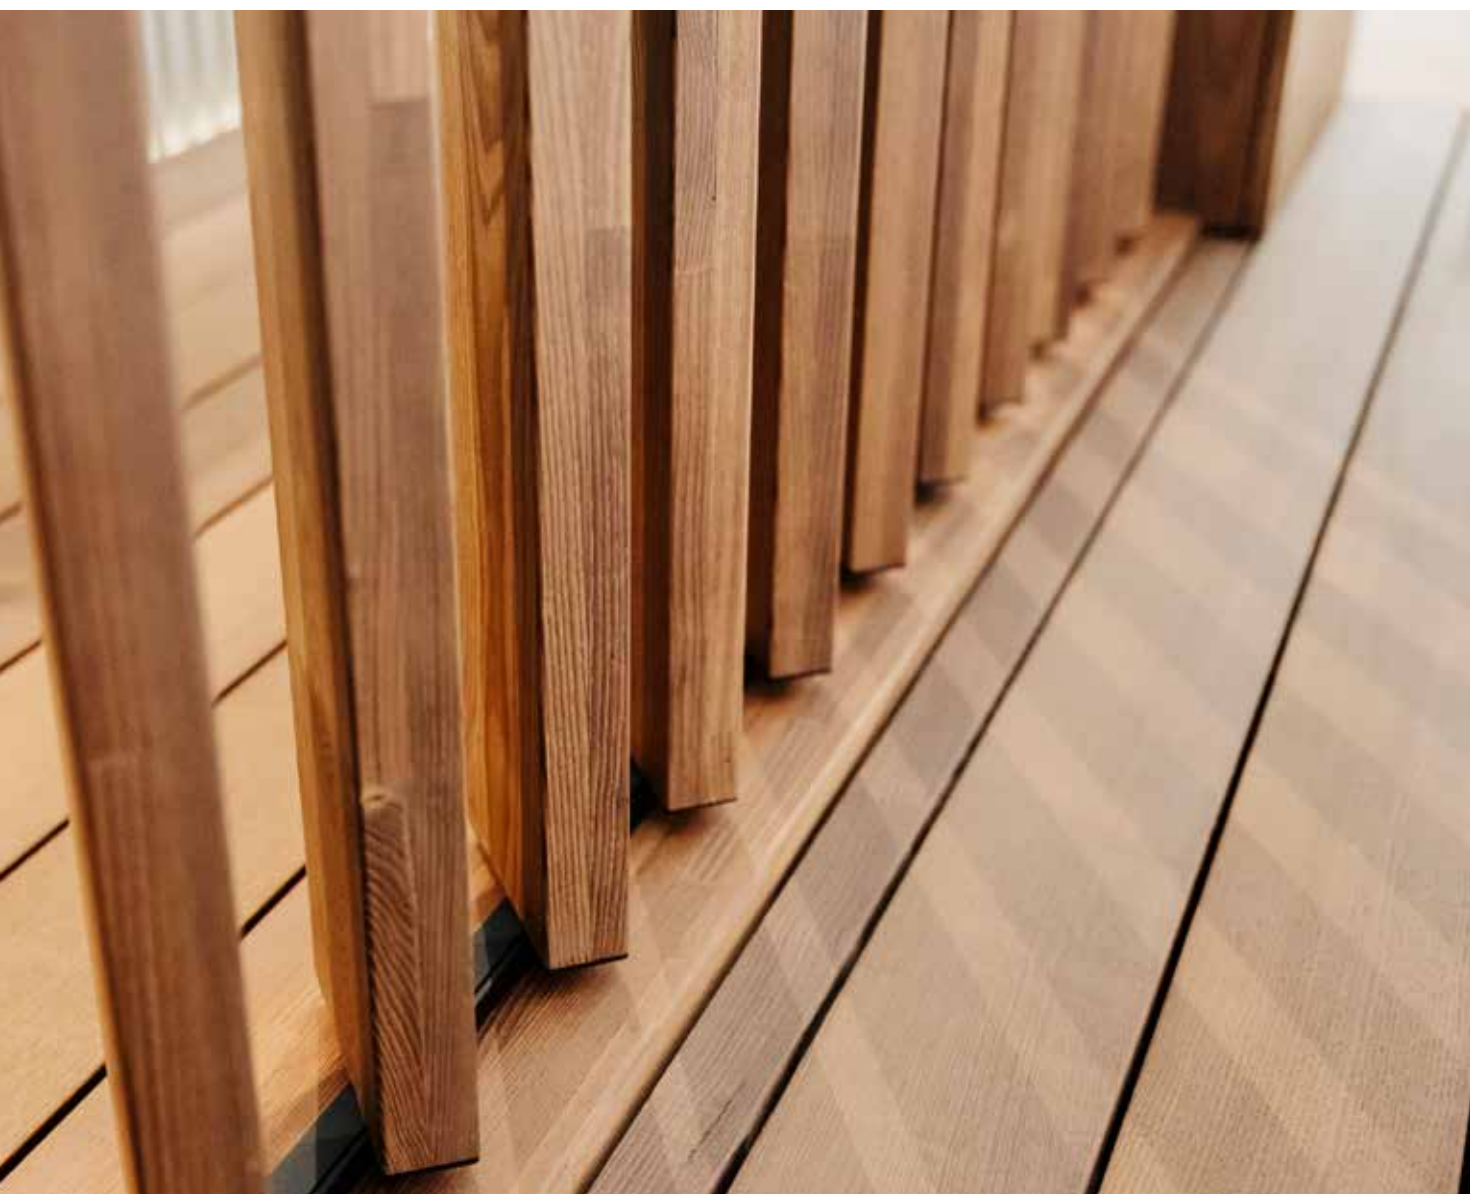

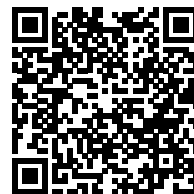

# Product range innovation

Thanks to a robust design in HOTwood ash, we can create extra long slats to your exact specifications. This opens up a wide range of new applications, complementing any architectural design, either for the garden or the home, beautifully.

XXL shutters can serve as sun protection, room dividers or wind screens. The adjustable louvers make it easy to transition from a full view of the surroundings to complete privacy and shelter from sun and wind.

## WHY CHOOSE CARPENTIER?

### Minimalist designs

Minimalist architectural designs are more popular than ever. Sleek lines and timeless styles are central concepts. Our wooden sun shades are a stunning feature in both modern and classic settings.

### The warmth of wood

Wood is an attractive, sustainable material that brings warmth and natural beauty to a home or garden. Our high-quality wood varieties develop a gorgeous patina over time.

### Outstanding quality

Pure craftsmanship combined with innovative design solutions, created in cooperation with leading product developers: the best recipe for perfect results.

### Tailor-made creations

Carpentier designs each project to measure using top-quality materials. With products delivered as ready-to-assemble kits, professional installation is always straightforward. .

### EPB norms

Carpentier wooden shutters help ensure buildings comply with EPB standards. Shutters are an environmentally-friendly way of deflecting solar heat, eliminating the need for air conditioning systems.

# Ecologically responsible wood varieties

Sustainable business practices and respect for the environment are top priorities at Carpentier, which was one of the first Belgian companies to achieve PEFC and FSC® certification.

We have stringent measures in place to ensure that all of our wood comes from legal, responsibly-managed forests. We never work with tropical hardwoods, instead deliberately opting for environmentally-friendly alternatives such as oak, barnwood, thermo ash, thermo pine, thermo bamboo, accoya, kebony, poplar and Douglas fir.
